

## PREDICTIONS FOR SHORE WAVE MOTIONS FOR THE MONTH OF JANUARY 2026 AT FORT STEVENS STATE PARK ASTORIA

These events are centered around the moon's orbit. Echoes from the moon, the events are calculated with moon bounce software. The events form different types of ocean waves and leave patterns in the sand. Look for soliton water waves also. Below are some of the dates for some of the strongest events.

FOR JANUARY 2026 Events are times of stirring water, and sand pools, and may last for several hours. Zero points occur 6 hours later and are temporary calming of the ocean waves.

Sat. 24<sup>th</sup> @ 11pm Major  
Zero Crossing (6 hrs. later)  
Sun. 25<sup>th</sup> @ 1:30pm Major  
Zero Crossing  
Mon. 26<sup>th</sup> @ 12 Noon  
1:30pm  
Zero Crossing  
Tues. 27<sup>th</sup> @ 1pm Semi-Major  
Zero Crossing  
Wed. 28<sup>th</sup> @ 2:30pm Semi-Major  
Zero Crossing  
Thurs. 29<sup>th</sup> @ 3:30pm **Major Long Event**  
Zero Crossing  
Fri. 30<sup>th</sup> @ 4pm **Major Long Event**  
Zero Crossing  
Sat. 31<sup>st</sup> @ 5am & 5pm – **Major Long Event**  
Zero Crossing  
Sun. Feb. 1st @ 6:30pm & Mon. @ 6:30am **Major Long Event.** Tide: Low 7:30am High 1pm

If the tide is going out, you may find this.  
Otherwise, it will be hidden under the surf.
