

James Clerk Maxwells Prayer.

Throughout history, nearly every culture has developed beliefs about spirits — non-material entities that exist in an unseen realm and can influence the living. These beliefs take many forms, from ancestral guardians to nature deities and elemental forces.

A complicated subject considering all the new findings. However, parts have been left out regarding the Creator. So, us in our always growing knowledge should not dismiss the spirit realm. In which all cultures have some belief. Total and complete disbelief will lead to problems in our society. The Christian bible as a history book gives us a good outline. Jesus dedicated his life to this. If you are going to believe is something you should read a paragraph or a few sentences often. Our thoughts need a sound foundation, all things in moderation.

I keep a copy of James Maxwell's prayer on the wall of my laboratory. I know/believe that the Holy Spirit guided many of these famous scientists, albeit somewhat unknown to them. Here is his prayer:

*“Almighty God, who hast created man in thine own image, and made him a living soul that he might seek after thee, and have dominion over thy creatures, teach us to study the work of thy hands, that we may subdue the earth for our use, and strengthen the reason for thy service; so to receive thy blessed word, that we may believe on him whom thou hast sent, to give us the knowledge of salvation and the remission of our sins. All of which we ask in the name of the same Jesus Christ, our Lord.”*

James Clerk Maxwell.

Maxwell (1831-1879) developed a comprehensive, theoretical and mathematical framework of electromagnetic field theory, embracing all types of energy systems (accepting gravity and nuclear forces) within the famous “electromagnetic wave spectrum.” Albert Einstein called Maxwell’s achievement “the most profound and most fruitful that physics has experienced since the time of Newton.”

Sin simply separates us from God, and one believes the lie.

Scientists often exhibit genius attributes like Tesla (1857-1943), whose father was a minister (these gifts are handed down through family lines).

Because of how the human brain works, we need to read a paragraph daily from the bible. If you want your family to be together and wholesome, a short passage and prayer at the dinner table is helpful. This also helps your work ethic. There will be scoffers, but the book has been written by famous intelligent people. You are still going to have trials. By medical miracles people are coming back from the dead more often now and tell both good and terrible stories of what they saw (the spirit world is real). We need to stand up for rightness and stop society break down by evil or ignorant people. Else evil creeps into our schools and political arena. Sound thinking

helps prevent gun violence in our schools. Do not let your guard down as there will always be people that choose and will not believe.

If you are tithing, it is a sin not to invest some money. Also, there is no way to determine what your future bills many years from now will be, so 10 percent of your income does not work any longer. Because of Doctor bills, vehicles, and housing are way more than they were 2000 years ago. It is your decision.
